Professional Experience

Product Manager | [SandboxAQ \(Google / Alphabet Spinout\)](#)

Jan. 2024 – Apr. 2025

- Directed product development and go-to-market for AQChemSim, SandboxAQ's materials-science LQM solution leveraging state-of-the-art physics-based methods, Bayesian optimization, and generative AI, to secure pilot collaborations (\$1M+ each) contracts with leading industrial partners.
- Spearheaded product strategy and global deployment of SandboxAQ's LQM platform, translating cutting-edge AI and quantum algorithms into scalable cloud services adopted by Global 1000 clients.
- Led the "[Market informed portfolio optimization methods with hybrid quantum computing](#)" project, published in Review of Financial Economics, presenting a novel hybrid quantum framework.

Associate Product Manager | [Good Chemistry Company](#)

Dec. 2022 – Jan. 2024

- Led analyses of market segments, competitive benchmarks, and technical performance to inform roadmap prioritization, validate features, and drive data-backed product decisions.
- Supported the end-to-end product development from concept through MVP by coordinating cross-functional teams of researchers, engineers, and designers.
- Crafted strategic product marketing collateral (white papers, case studies, decks) that sharpened company messaging, attracted qualified leads, and fostered an engaged quantum community.

Research Scientist | [1QBit](#)

Jan. 2020 – Dec. 2022

- Founded an educational product to generate qualified leads, establish a sustainable talent pipeline, and elevate 1QBit's leadership through workshops, pilot projects, and 6 published [white papers](#).
- Coordinated with multidisciplinary teams and stakeholder communications, to translate complex quantum and AI concepts into clear deliverables, technical roadmaps, and executive briefings.

Chief Data Officer | [STEM Fellowship](#)

Feb. 2020 – Oct. 2022

- Coordinated the organization's [data-driven programs](#), increasing client base by 123.5% and external reach to 56,221 leads, by defining, developing, and monitoring data-driven metrics.
- Managed a multidisciplinary team to design and launch 3 products, where the latest two flagship product updates resulted in a ~20% increased revenue year-over-year for the past 3 years.
- Engineered a NLP machine learning tool to identify project candidates from social media data. The model achieved >0.94 AUC and integrated into multiple workflows – [Publication 1](#), [Publication 2](#).

Skills

Product Management: Strategic Roadmapping, Agile & Scrum Methodologies, Data-Driven Decision Making, UX Collaboration, Go-to-Market Strategy, Stakeholder Management & Communication

Quantum Computing: Quantum Algorithm Development, Advanced Mathematics & Linear Algebra, Quantum Simulation & Benchmarking, Proficiency in Quantum SDKs.

Computational: Numerical Methods & Algorithms, Parallel & Distributed Computing, Scripting & Automation, Simulation Software, Version Control & CI/CD, Cloud & Containerization, Software Development Lifecycle (SDLC)

Data Science: Programming (Python, R, SQL), Machine Learning & Statistical Modeling, Data Visualization, Big Data Technologies, Model Evaluation & A/B Testing, Cloud-Native Deployment.

Education and Certifications

B.Sc. Honors (Distinction) – Chemical Physics – [Simon Fraser University](#) – [Valedictorian Speech](#).

Certificate of Achievement in Pharmacology – Drug Discovery and Development – [Harvard Medical School](#).

PMP (Project Management Professional) – [Project Management Institute](#).

PSM (Professional Scrum Master) – [Scrum.org](#).
